

# PAPERKUT Paperless Receipts

Application based on mobile OS: Android 2.3 and up.

## Receipts Manager

You don't like those paper receipts. They sit in your wallet, scattered around your desk drawers and are hardly used. They create so much waste around. You can't make any sense or logic out of paper receipt piles. To overcome this, Paperkut Android app is offering you a better way to handle your purchase receipts, eliminating paper waste and giving you a better and simpler way to manage your personal or business finances.

## So, How Does It Work?

PAPERKUT turns everyday paper receipts into paperless copies, delivering them automatically to your online banking account without any changes to the existing checkout experience. The clean and elegant application organizes all your paper receipts into a logical, easily searchable personal database, so you don't have to worry about those receipts until you really need them.

## Benefits of Paperkut Paperless Receipts

- Eliminate paper clutter in your wallet and drawers by storing digital copies of your transactions in your smartphone and in cloud
- Keep track of your expenses to improve bookkeeping cycle
- Capture your paper receipts using your device camera, even longer receipts (stitch images in one)
- Generate PDF and CSV spending reports that can be shared with your email accounts or saved in a cloud
- Group receipts into categories
- Search receipts by keywords, product names or filters (store name, date)
- Have that receipt copy handy whenever you need to claim an expense or a refund
- Save money by receiving offers and coupons from participating merchants.

- Keep reserve copies on your SD card, or in the cloud (Google Drive, Drop Box, Windows network).
- Integration with your online banking services.
