

LitRes: Listen!

Application based on mobile OS: Android 2.2 and up

What is “LitRes: Listen!”?

Mobile application LitRes: Listen! was created and is being supported for LitRes Inc., the leading vendor of licensed electronic books (e-books) in Russia and CIS countries. LitRes offers its customers tens of thousands of electronic books and several thousands of audio books, which are easily accessible from any electronic device, including devices using Android OS.

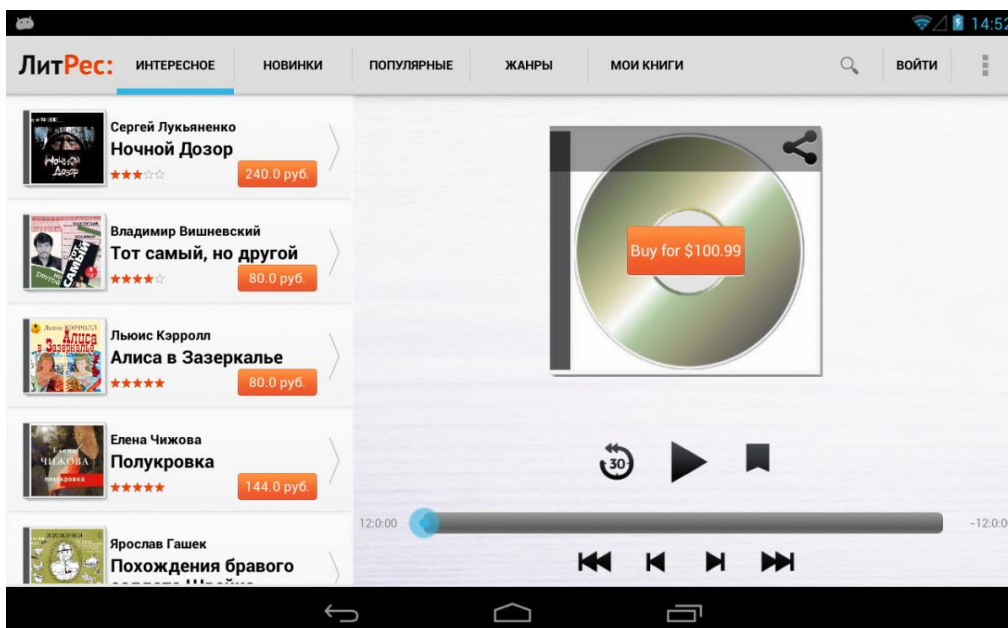

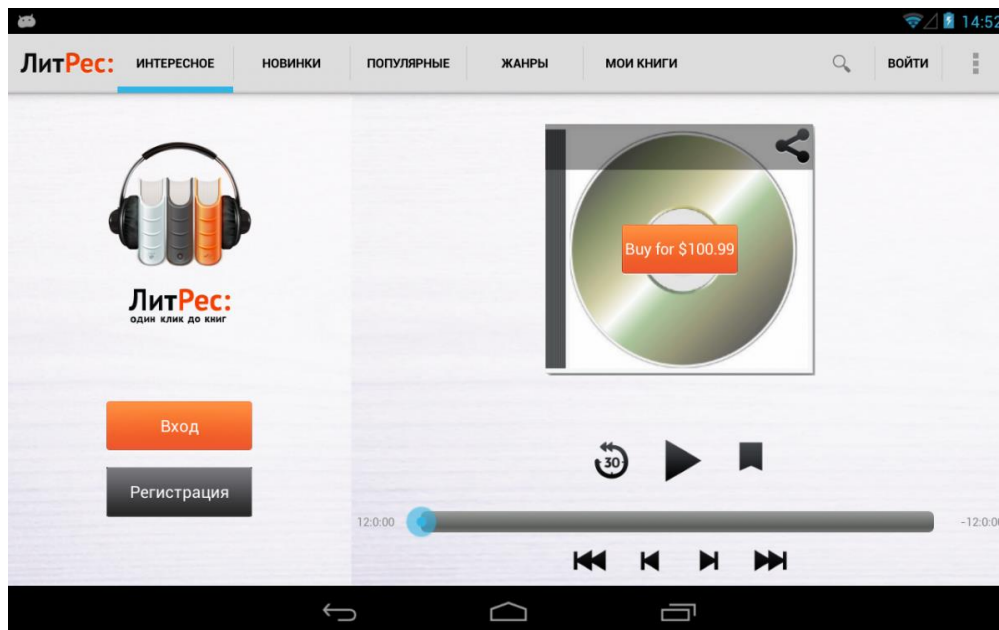

Audio Book companion through LitRes

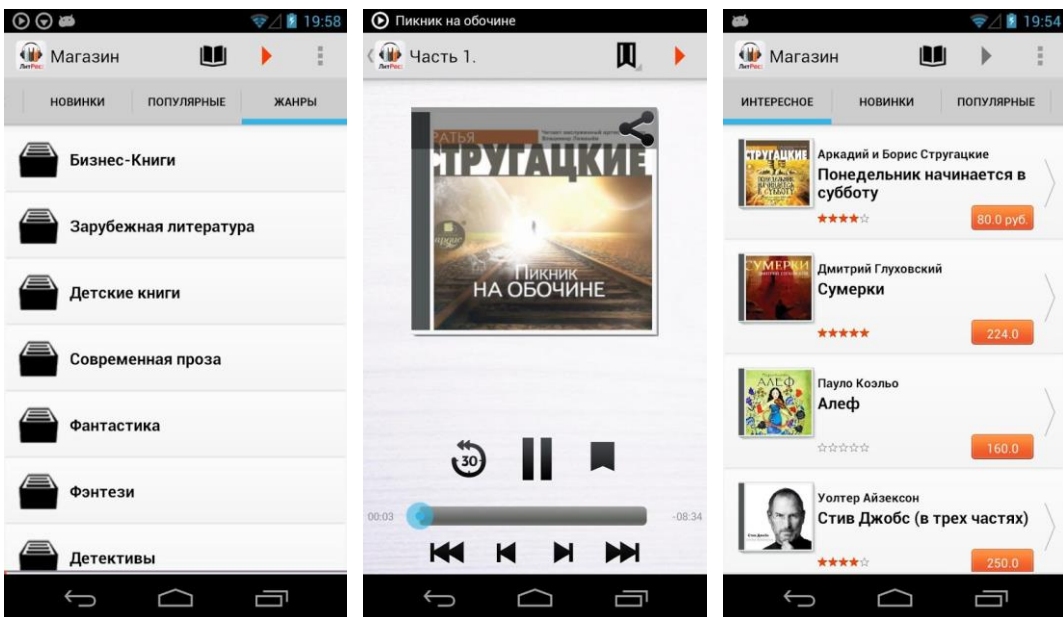

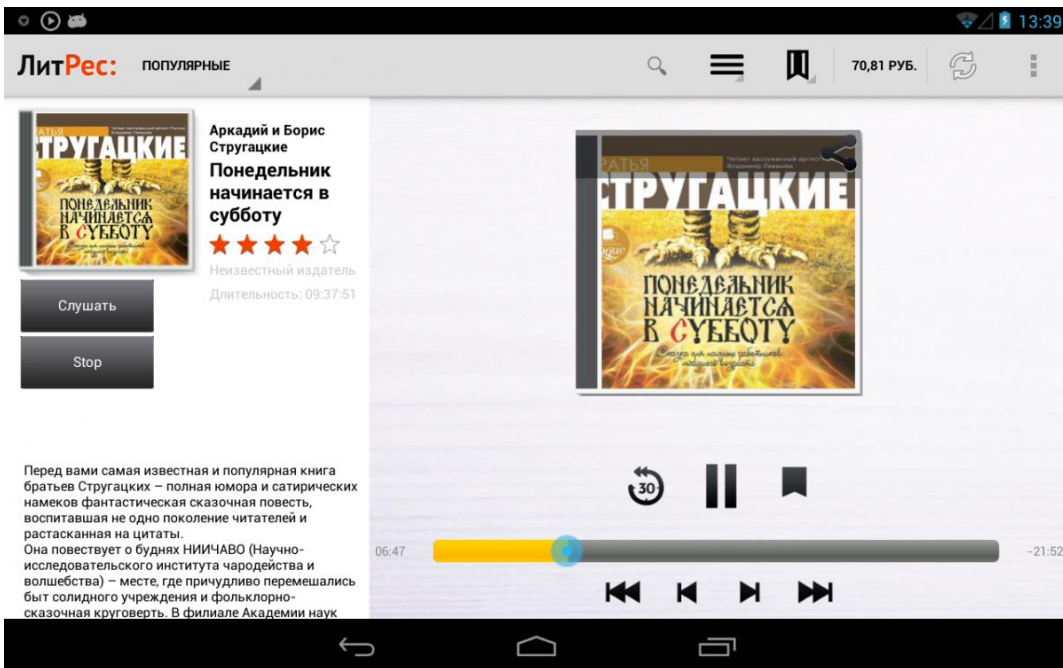

LitRes: Listen! is an Android mobile application that serves as a simple and convenient tool for selection and listening to the favourite audio books. The application provides access to the LitRes catalogue, being the largest catalogue of audio books in the Russian-language internet growing every day. Currently the catalogue includes over 3000 titles, from hot new additions from contemporary writers to classics.

Application User Options

- Application allows to listen to and rate an audiobook fragment before purchasing (from 10 to 60 minutes).
- Convenient “Book Shelf” provides an easy access to all previously purchased audio books on all connected devices and LitRes web site (the user needs to log in).
- Option to play audiobooks in the background.
- Browse other users’ feedback, leave your own feedback on books previously purchased.
- Listen to the books downloaded without the internet connection present.
- Easily manage you electronic audio books, purchased at online LitRes store:
 - browse books by purchase date, title, author, genre;
 - get relevant information at author page, where biographies, book reviews are displayed; get quick access to book series;
 - books are displayed either in a list view or a graphic image view.

User Interface

Technical Requirements
